

ABSTRACT

5 A therapeutic agent for treatment of acute lung  
injury, especially acute respiratory distress syndrome  
and adult respiratory distress syndrome, resulting from  
indirect causes, especially the sepsis syndrome, severe  
nonthoracic trauma, hypertransfusion during emergency  
resuscitation, and an artificial cardiopulmonary bypass  
surgery, and a therapeutic agent for hypoxemia in acute  
10 lung injury, said agents comprising anti-IL-8 antibody as  
an active ingredient.
